

Gwen Smukowski, RDH, BS

Gwen is the Founder of Continuity Consulting, an educator and coach, a national speaker, as well as clinical hygienist in private practice. Gwen maintains her focus on the development and expansion toward excellence in periodontal care and aesthetic/restorative team support. This focus on excellence has taken her worldwide as an instructor and speaker on the subjects of laser-assisted periodontal health, practice management, leadership development, operational excellence, integrated marketing and team-based comprehensive dentistry.

Gwen brings this broad perspective of clinical, managerial and academic experiences to her work. As a consultant and coach, her focus is to inspire and empower dental teams with current research, technology, and the systems necessary to reach new levels of growth and success for their practice.

CO₂ Laser Assisted Periodontal Therapy (LAPT) for Dental Hygiene

COURSE DESCRIPTION:

This course will discuss in detail how lasers enhance the anti-infective model, understanding the host-immune response, biological testing methods, laser safety and comfort control, treatment planning and documentation, insurance coding and scheduling, case presentation to increase case acceptance, and marketing and implementation. This course will include live patient demonstration and chair-side laser training.
